816.695.8206**

With Guest Speaker

## Cassandra McCormick

An Individualized Education Program is the foundation of the special education journey. Grasping the key components of an IEP empowers you to play a proactive role in crafting a plan that suits your child's requirements. Together, we'll explore the fundamental elements crucial for an impactful IEP, enhancing your confidence as a valued collaborator and an equal participant in your child's IEP team.

With 16 years of experience as a special educator in the North Clackamas School District, Cassandra brings a wealth of expertise to the table. Armed with a Master's Degree and an additional 45 hours of specialized training in special education specialty areas, she is well-versed in self-contained classrooms, behavior management, and Augmentative Alternative Communication (AAC).
